

The purpose of this CFAC meeting was to hear one agenda item presented by Legislative Services

Chairman Adams started the meeting at 3:01pm with all members present except Dennis Johnson.

Eric Milstead of Legislative Services Office presented the ask from legislative services to bolster IT services and equipment at the Idaho Statehouse for the coming working groups, organizational session, and beyond. This request would help the legislature stream its committees and meetings through Idaho Public TV to the public by putting additional video cameras in each of the committee rooms – this would be an upgrade from currently only having two committee rooms with video camera capacity. This work will support public access and engagement in the legislative process while social distancing guidelines are in order. Senator Bair moved to support the request as proposed, seconded by Shawn Keough. Representative Wintrow made an alternate motion that moved to support the request as proposed along with provisions to ensure that the interim work was presented with closed captioning, totaling an extra \$20,000 for the project. Matt Newton seconded the alternate motion. The alternate motion was voted on first and passed unanimously.

Chairman Adams adjourned with the intention to meeting in the following week on further proposals for the committee.
