

New COVID-19 Funding Opportunity

Funding Opportunity Announcement

The Division of Behavioral Health has launched a new Funding Opportunity Announcement (FOA) to establish Emergency Department Psychiatric Triage Centers (ED-PTCs).

The purpose of this funding opportunity is to:

- Stand up ED-PTCs in areas seriously impacted by COVID-19.
- Provide behavioral health services during the pandemic to Idahoans suffering from a behavioral health emergency, but who do not have critical medical health needs.

The ED-PTCs will be established individually to meet the needs of the community and must be able to:

- Conduct ED triage.
- Provide the appropriate level of behavioral health interventions for patients requiring an in-patient level of care for as long as the patient requires or until that patient can be transferred to a more permanent facility.
- Divert those with less acute needs to an alternative resource.

FOA Application
