

PROVIDER CAPACITY, SAFETY, AND REPORTING GRANTS

The **Department of Health and Welfare** is offering grants to vaccine providers working in local communities to support COVID-19 vaccine administration. The grants support the following strategies:

1. Increase COVID-19 vaccine capacity throughout all Idaho counties/local public health districts
2. Ensure safe storage and handling of COVID -19 vaccine
3. Ensure equitable distribution and administration of COVID-19 vaccines

All enrolled COVID-19 vaccine provider organizations should enter dose information into the IRIS system quickly for accurate reporting and operational planning.

GRANT OVERVIEW

For vaccines requiring two doses

**1st
DOSE**

\$15 per dose
when the vaccine information is recorded in IRIS within 72 hours of administration of the 1st dose

**2nd
DOSE**

\$25 per dose
when the vaccine information is recorded in IRIS within 72 hours of administration of the 2nd dose

For vaccines requiring a

**SINGLE
DOSE**

\$20 per dose
when the vaccine information is recorded in IRIS within 72 hours of administration

The Department of Health and Welfare will provide grants to eligible providers for any vaccine administration beginning with Group 1 administrations and through Group 2. Additional awards will be assessed for additional phases and announced based on fund availability.

ALL THE DETAILS

Our goal is to offer vaccines as quickly and safely as possible to Idahoans who choose to get the vaccine.

The vaccine program is designed to protect the most vulnerable in Idaho, reduce deaths, reduce hospitalizations, and maintain critical services and acute care in our communities. To achieve this, we must increase provider capacity, so individuals will have more options to access the vaccine.

Funds awarded can be used for the following:

1. Increasing resources, including staffing
2. Ensuring proper infrastructure
3. Purchasing equipment and supplies necessary for safe vaccines
4. Developing clinical strategies to ensure access for hard to reach and vulnerable populations (for example: mobile vaccine clinics)
5. Partnering with non-clinical partners to find novel solutions to getting vaccines administered to populations

Grant requirement: Providers must be enrolled through IRIS/Division of Public Health as a qualified vaccine provider organization and complete an attestation and agreement to be eligible for this program. If you have any questions, please email us at COVID19VaccineProvider@dhw.idaho.gov.
